

6 September 2021

Dear Parents and Caregivers,

**‘Spring into Spring’ Week 10: 13-19 September, 2021**

Our students, parents, support staff and teachers have worked incredibly hard this term under extraordinary conditions. Certainly, this pandemic has brought about unforeseen challenges for all, and with this in mind, community wellbeing continues to be our priority. To foster the wellbeing of our learning community as we head into a second round of holidays in lockdown, we have deemed the final week of term, **‘Spring into Spring’** week.

**Week 10: Monday-Thursday**

The focus of ‘Spring into Spring’ week is for students to engage in learning activities that develop skills in design and creativity, promote family connectedness and reduce on-screen time. Students are expected to access the remote learning slides, complete the daily Stage based Morning Routines and Math activity, then spend the afternoon engaging in challenges and activities that require time away from a device. These slides are accessed through the usual online platform during remote learning, relevant to each stage. Student engagement will be monitored through the photos they send to their class teacher, capturing their experiences and creations.

**Week 10: Friday 27 September**

The final day of ‘Spring into Spring’ week is structured to promote family wellbeing and set a positive tone for the end of term. Students can choose to engage with a range of activities located in the [YPS Wellbeing Hub](#).

We hope ‘Spring into Spring’ week allows for students and families to take a breath, reset and recharge in time for school holidays.

Stay safe, stay well.

The Wellbeing Team.
